Art Unit: 2614

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed (note MPEP 606.01). Applicant should mention size control.
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
3. Claims 17 and 36 are objected to because of the following informalities: applicant may consider adding the word "period" after "time" in the last line of both of these two similar claims. Appropriate correction is required.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 14, claim 19 line 15, and in claim 20 line 12, applicant should recite "one of *other* window elements" to distinguish the (telecast or one) window from the remaining windows. The scaling to an equal to or less than a predetermined size would not make sense otherwise.

In claim 2 line 3, "said window" lacks antecedent basis and should likely be changed to "said *one* window".

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Claims 1-39 (as likely intended to be understood) are nonetheless allowable over the prior art because the prior art does not disclose or suggest changing the size of a window based on an extracted contour area of detected text information, as is claimed.
